REPLACEMENT/ALTERATION MEASURING INSTRUCTIONS

Measure Existing Cover:

- 1. Begin with a freehand sketch of the cover and pool.
- 2. Measure the overall length and width of the cover.
- 3. Measure all grid sections along the width and length of the cover.
- 4. Measure all the cover edges from corner to corner.
- Measure the distance the anchors are set back from poolline. Indicate on sketch any anchors that are less than 16" from poolline or more than 24" from cover.
- 6. Measure cover overlap.

A-B Measure of Pool & Anchors:

Anchors and Pool must be measured from same baseline A-B line must be at least 3' back from any anchor

- Begin with a freehand sketch indicating pool shape, obstructions and location of AB line.
- 2. Take AB measurements to each anchor on deck.
- 3. Take AB measurements around entire pool and to any obstructions within 3' of the pool

MARKING COVER INSTRUCTIONS FOR ALTERATIONS

Use a black marker or light colored lumber crayon to mark cover. Do not place notes on the cover.

- 1. If adding or taking away material show arrow in the correct direction and write dimension of amount of material to be added or taken away next to arrow.
- 2. Mark start and end point for raised walls, cut outs and steps.
- 3. New drain and pad locations should be marked with an **X** at the center location of where the pad or drain is wanted. Standard drain/pad sizes will be used unless otherwise noted
- 4. Give a detailed description of alteration on measure form.
